

VCS install

Python install

```
C:\Users\adria.DESKTOP-VS8AFP9>py --version
Python 3.12.4
```

Python file

The image shows a Visual Studio Code editor window with a dark theme. The editor is open to a file named `helloworld.py`, which contains the following code:

```
1 print("Hello, World!")  
2
```

The file path in the breadcrumb is `C: > Users > adria.DESKTOP-VS8AFP9 > Downloads > helloworld.py`. The bottom status bar shows the `TERMINAL` tab is active, displaying the command prompt output:

```
PS C:\Users\adria.DESKTOP-VS8AFP9> & C:/Users/adria.DESKTOP-VS8AFP9/AppData/Local/Programs/Python/Python312/python.exe c:/Users/adria.DESKTOP-VS8AFP9/Downloads/helloworld.py  
Hello, World!
```
